

Office 365 Administration and Troubleshooting

Length: 3 days

Format: Bootcamp

Time: Day

About This Course

This is a three-day Instructor Led Training (ILT) course that targets the needs of information technology (IT) professionals who take part in administering, configuring, troubleshooting, and operating Office 365 services, including its identities, dependencies, requirements, and supporting technologies. This course focuses on skills required to administer and troubleshoot Office 365 tenant and key services of Office 365, such as Exchange Online, SharePoint Online and Skype for Business and Teams. It also covers security and compliance features of Office 365.

Required Exams

Audience Profile

This course is intended for IT professionals and system administrators who want to learn about administration and troubleshooting techniques in Office 365. These professionals should have at least three years of experience working in their respective fields: ideally in the areas of system administration, network administration, and messaging.

Course Objectives

By completing this course, students will learn how to:

- * Describe Office 365 services.
- * Administer Office 365 by using the graphical environment and Windows PowerShell.
- * Administer and troubleshoot directory synchronization and directory objects.
- * Administer and troubleshoot Exchange Online.
- * Administer and troubleshoot Skype for Business Online and Microsoft Teams.
- * Administer and troubleshoot SharePoint Online.
- * Plan and deploy Microsoft Office 365 ProPlus.
- * Administer and troubleshoot compliance and security in Office 365.

Outline

Module 1: Office 365 services overview

This module describes the features of Office 365 and identifies recent improvements to the service. It also identifies licensing options, describes the process of Office 365 tenant configuration, and lists appropriate Office 365 client options.

Lessons

- * Overview of Office 365 services
- * Office 365 licensing overview
- * Office 365 tenant configuration
- * Office 365 clients

Module 2: Office 365 administration, tools, and techniques

This module describes how to manage Office 365 by using the administrative portals and Windows PowerShell. It also explains how to manage administrative access and troubleshoot administration in Office 365.

Lessons

- * Managing Office 365 with the administrative portals
- * Managing Office 365 with Windows PowerShell
- * Managing administrative access in Office 365
- * Troubleshooting administration in Office 365

Module 3: Administering and troubleshooting directory synchronization and directory objects

This module describes directory synchronization and federation. The module explains how to manage Microsoft Azure Active Directory Connect (Azure AD Connect) and user and group objects in Office 365. Additionally, it describes how to troubleshoot objects and directory synchronization in Office 365.

Lessons

- * Overview of directory synchronization and federation overview
- * Azure AD Connect management
- * Managing users and groups objects in Office 365
- * Troubleshooting objects and directory synchronization in Office 365

Module 4: Administering and troubleshooting Exchange Online

This module describes the subscription options and roles in Exchange Online. It explains how to administer Exchange Online recipients and client access policies in Exchange Online and how to troubleshoot Exchange Online.

Lessons

- * Exchange Online management overview
- * Administering Exchange Online recipients
- * Administering client access policies in Exchange Online
- * Troubleshooting Exchange Online

Module 5: Administering and troubleshooting Skype for Business Online and Teams

This module describes Skype for Business Online and Teams. It explains how to administer, manage, and troubleshoot Skype for Business Online and Teams.

Lessons

- * Skype for Business Online and Teams overview
- * Administering and managing Skype for Business Online and Teams
- * PTroubleshooting Skype for Business Online and Teams

Module 6: Administering and troubleshooting SharePoint Online

This module describes how to configure SharePoint Online settings and site collections and external user access to SharePoint Online. It also explains how to manage Microsoft OneDrive for Business synchronization and how to troubleshoot SharePoint Online.

Lessons

- * SharePoint Online management overview
- * Administering SharePoint Online site collections
- * Administering external users in SharePoint Online
- * Configuring OneDrive for Business
- * Troubleshooting SharePoint Online

Module 7: Planning and deploying Office 365 ProPlus

This module describes Office 365 ProPlus. It also explains how to plan and manage user-driven Office 365 ProPlus deployments and how to troubleshoot the deployments.

Lessons

- * Overview of Office 365 ProPlus
- * Managing user-driven Office 365 ProPlus deployments
- * Troubleshooting Office 365 ProPlus deployments

Module 8: Administering and troubleshooting compliance and security in Office 365

This module describes the compliance features in Office 365. It explains how to administer Azure Information Protection and the compliance features in Office 365, how to configure and administer email security in Office 365, and how to troubleshoot Office 365 compliance and protection.

Lessons

- * Overview of compliance features in Office 365
- * Administering information protection in Office 365
- * Administering compliance features in Office 365
- * Configuring and administering email security in Office 365
- * Troubleshooting Office 365 compliance and protection
